

The Word Game: A Conversation Guide

Goals:

- Improve your ability to express yourself in the language you are learning
- Improve your ability to speak comfortably

Description:

The goal of the game is to be able to express what you think about when your partner reads you words (in the language you are learning) from the list below. This could be: a memory, a story, a belief, etc.

*Note: The game works really well if you set a rule that each person **has to** talk about a word for at least one minute.*
